

SUPRA[®]

CLEAR ARMOR

WINDSHIELD PROTECTION

THE ULTIMATE PROTECTION PRODUCTS

CLEAR ARMOR BENEFITS

- 10X stronger than factory windshields.
- Protects from stones, sand, & road debris.
- Repels rain, snow, slush, insects & more.
- Inhibits glass pitting, small chips and fine scratches
- HD glass experience, more clear & reduces glare
- Last up to 6 months on windshields

SUPRA FOR INCREASED VISIBILITY & SAFETY.

Improving visibility during precipitation events and at night can improve your reaction time and create a safer driving experience for you and your family. When Clear Armor is applied to your windshield, it makes visibility crisper as though you were looking through HD glass.

The Clear Armor process fills in all the peaks and valleys that glass naturally has, increasing repellency by sealing the windshield. This makes rain, insects, snow, and frost easier to remove.

Clear Armor is a product that has outstanding durability, very long service life, very high abrasion resistance and chemical resistance.

The simple two-step product application can greatly improve clarity and visibility to extend driver reaction time.

The water, soil & stain repellent coating is resistant to removal by any soap, solvent or detergent that would not etch or damage an untreated version of the same surface. It can be removed by abrasion and the abrasive action of mechanical windshield wipers. In that event, it can be infinitely re-applied without buildup. For optimum visibility, reapply Clear Armor RELOAD (step 3) when needed.
